It's changing again

The air is crisp and biting cold

there's leaves on the floor

there's mist in the valley

the trees don leaves of copper

and the nights are long and dark

It's changing again

slowly but surely

and I'm apple bobbing with a friend

and I'm watching as everything starts

again

I think things look better

it changes again and again

Paws and Purrjudice

Pistachio and Almond are a pair of cats that used to be the pets of Dracula, but were kicked out and replaced by dogs. The reason they were kicked out was because, as it turns out, Dracula hates cats. He's also allergic to nuts, so he named the cats after his least favourite things. The cats are now on a mission to get revenge on Dracula for replacing them...
